## BAFFLING BURGLARS

Burglars entered the residence of Mr. G. F. Adams, 148 East New York street, Saturday night, and stole two solid gold watches and several rings, one a valuable diamond. Entrance was made through one of the side windows, a wire being used to throw the window latch. No house ever built, except a jail or a castle, can keep burglars out. The only protection is to secure a compartment such as may be had in the SAFETY VAULTS of THE INDIANA TRUST CO., where not only money or valuable papers may be stored, but jewelry; family plate, furs, clothing, etc. A box in the Trust Company's Safety Vaults costs only \$5 up for a whole year.

Yesterday the stock market reflected a more hopeful view of the immediate outlook, although the trading was only moderate in volume. The transactions were fairly well distributed, and substantial advances in prices occurred in some instances. The traders appeared to disregard a renewal of the "special" gold exports to Europe. The firm which has recently made two ship-ments of gold on Russian account yesterday withdrew from the subtreasury \$700,000 which will be forwarded to Germany by to-day's steamer. The last two previous ex-ports by the house in question have been followed by withdrawals on one of the govment depository banks. The favorable in-nces bearing on the market included the more seasonable weather, a belief that a conservative attitude will be maintained by les and expectation of an early aljournment of Congress. The last theory is based on the probable desire of members of Congress to make preparations for the national campaign. Another encouraging develop-gold cannot be shipped on any purely ex-change operation. The suspension of a formerly prominent bear house falled to cause a ripple. Such reports as can be se-cured regarding the crop outlook at this season are favorable. In several stocks pool ying served to advance prices. Dealings in the railway list were on a moderate scale, although a flurry in Reading occurred in the coalers. London was a moderate seller of St. Paul, but all offerings were readily absorbed, and later in the day purchases of various stocks were noted for foreign account. Sugar led the market in point of activity and strength. The rise in this stock was attended by further advances in the price of the product. Partly on this account indide potassium. Sugar led the market in point of activity and strength. The rise in this stock was attended by further advances in the price of the product. Partly on this account and on pool buying an advance of 2 per cent. occurred, to 121%. The preferred stock rose 1% per cent. Chicago Gas gained 1% on continued suggestions of a probable early dividend payment. Tobacco fluctuated as usual in an eccentric manner and left off with an in an eccentric manner and left off with an improvement of a point. It was noted that brokers for insiders were the principle sellers of the stock to-day, while the buying was chiefly to cover shorts. The committee on securities of the Stock Exchange has ruled that due bills must be given both for the cash and for the scrip dividends, the receiver of the due bill being entitled to demand a cash osit by the maker. The dividend scrip was quoted to-day at 55@75c. Consolidated Gas advanced 2 per cent, and important gains were scored in several other specialties. In the late trading the anthracite shares at-tracted attention by substantial gains on a moderate volume of business. Reading advanced 24. Week Opens with More Active Trade and Few Fluctuations. On the wholesale streets and on Commis sion row yesterday there was a fair volum of business in progress. The dry goods houses and milliners had the best day in weeks and grocers were very busy. On Commission row less complaint is heard. A large amount of stuff must be handled to realize much profit, so low are prices. As would be expected the warmer weather had made the poultry, egg and butter markets easier. Provisions ruled more steady, with a fair volume of business. The hide market firm. The hay market is firm, receipts of baled hay light. Iron and hardware markets are both in strong position and higher prices

The local grain market is tame. Transactions are few and receipts moderate. Track bids yesterday ruled as follows: Wheat-No. 2 red, 70c; No. 3 red, 66@67c;

## WHEAT'S SHARP RISE

AFTER EARLY WEAKNESS THE CHICAGO MARKET BECAME FIRM.

Scored Fractional Advances-Pork Declined.

CHICAGO, April 13 .- Wheat kept speculators in that cereal guessing to-day. It opened weak, but unchanged, for May, dropped %c, and then made a sharp advance, closing at the highest point of the day. Corn and oats each made some advance, amounting in one case to 4c. and in the other to %c. Provisions lost a trifle of their Saturday's closing. The wheat market opened to-day as if

was still suffering from a continuation of its irrational bearishness because of a bullish government report. The reign of reason was resumed later in the day when it was made known that the rain of different signification which had been ruling the minds of the traders, had only fortified the government's estimate of the poor condition of the crop by unmistakably revealing its deficiencies. That and other bullish items of news detailed in the remarks that follow caused wheat, after declining to 64c, to low caused wheat, after declining to 64c, to rise to 65½c, at which latter price it closed. Traders in May commenced at about the price it left off on Saturday, 64%c and 64½c being curent simultaneously in different parts of the pit at the opening. It recovered quickly to 64%c, and then began a decline, which, in about an hour's time, had reduced to 64c. July was traded in to almost as heavy an extent as May. While May fluctuations just recorded were taking place July was tumbled from 65¼ to 64%664%c.

Corn was very firm, inasmuch as it took no note of the early declines in wheat. May closed on Saturday at 29%629%c, did not sell below 29%c and rose near the end of the session to 30@30¼c, and closed at 30%c, making a net gain for the day of about ½c per bu.

In oats business was of moderate volume and the market was active and firm from start to finish. May opened at 19½c, sold up to 19%@20c and closed at 19%c bid, an advance of ¼@¾c since Saturday. July ranged from 19¾@19%c to 20¼c, and was offered at the last price at the close, which was an advance of ¾@½c.

Provisions were fairly active, but principally in the way of setting open trades in cipally in the way of getting open trades in May over into July in the end, and not hough the buying in of short pork promised at one time an advance for the day in than it did on Saturday. Lard and ribs also Estimated receipts for to-morrow are: Wheat, 20 cars; corn, 210 cars; oats, 240 cars; hogs, 19,000.

From a Broker's View Point. (By S. C. Igoe & Co.'s Wire, 429 Lemcke Building.)

CHICAGO, April 13.-The demoralization in the wheat pit appears to be over for the present. Wheat declined on Saturday a full 2 cents without any good reason beyond the selling of more than the market would take, With California, and Australia, and India out of the market as sellers and the Argentine Republic reported about through, the wants of Europe may be supplied from unseen sources not known to the trade. England and the continent depend on Russia and America until September. If they can get all they need without advancing we may as well give up guessing. Advances we have looked for may not come until opening of navigation, when it does come it will be without any uncertain sound. We think July will bring the usual carrying charges. Corn opened quiet. There was very light trade until wheat commenced to advance, when shorts became anxious buyers and as there was very little for sale the market advanced sharply. Estimates for to-morrow light and reported considerable taken for

Oats quiet and trade light. Little firmer in sympathy with higher corn and wheat.

Provisions opened slightly lower on more hogs than expected and weakness in grain. There was a good local demand later and rices ruled strong. Covering by local operators about the only feature.

A PROBLEM IN LIGHTS

WORKS BOARD SCALES DOWN COUN-

CILMEN'S ESTIMATES. Refuses to Ask for More than \$2,000-Council Propose to Further

Investigate.

Yesterday Controller Johnson took up th ight question and asked the Board Works to grant a conference with the members of the Council, which the board magnanimously condescended to do, and vesterday afternoon about half of the councilmen were present to speak for their wards. Every ward was represented either by a Councilman or a proxy. Mayor Taggart and Controller Johnson were also present. The board told the lawmakers that not more than \$2,000 would be asked for for lights, and Controller Johnson said not recommend the appropriation of a greater sum. The information was also given by Mr. Downing that, on account of the long delay caused by the Council, \$2,000 would now enable the board to pay for 125 lights during the rest of the year. There are 827 lights now in use, and the addition would make 952. When this was stated to the councilmen it was added that they would have to scale down their estimates. At first they had given in the figures that they could not get along 127 lights were asked for, although some of the councilmen objected to cutting down

their estimates. In the Fourteenth ward Mr. Smith wanted wenty new lights, and asked that two be changed from their present locations. He was finally prevailed upon to allow this estimate to be cut off to fifteen. Mr. Ohleyer, of the Fifteenth ward, asked for twenty new lights and was also cut down to fifteen. In the Third ward Mr. Payne insisted on sixteen, but it was thought by most of the members present that the Third ward is well enough provided for, and this estimate was cut down to seven, over the protest of the councilman, who in the same proportion that others were scaled, but did not think it was just to cut him from sixteen to seven. Mr. Wolcott, of the Fifth ward, asked for eighteen and was cut to twelve. was cut to twelve.
It was then decided that the board should take the lists as made out by the cou men and look over the territory; in the meantime the Council is to pass the ordinance appropriating \$2,000. It was specifically stated by Mr. Downing that the board would not consider itself bound in any way by the locations of new lights as given by the Council, nor by the number asked by each, but that wherever it was deemed advisable the wishes of the council-

each ward from the requests of the councilmen is as follows: First ward, 10; Second, 6; Third, 7; Fourth, 15; Fifth, 12; Sixth, 4; Seventh, 4; Eighth, 10; Ninth, 12; Tenth, 3; Eleventh, 4; Twelfth, 6; Thirteenth, 4; Fourteenth, 15; Fifteenth, 15.
About half of the members of the Council were present last night at the called meeting of the committee of the whole. Several were present who did not attend the meeting in the afternoon, and they objected to the action taken. Mr. Costello said it showed scant courtesy on the part of the other members to attend such a meting, when the question was pending in the committee of the whole. The result was that the action of the afternoon was practically Sheep and lambs-Receipts none; shiprejected by the committee, and on motion of Mr. Shaffer it was decided to call another meeting of the committee of the whole for Thursday night and request the Board of Works, the Mayor and controller to be present. The members present thought the estimates for lights should not be cut down but that at the meeting to be be cut down, but that at the meeting to be held Thursday night each member should present a list of the places where he wants lights placed, including only such places as he may deem in absolute need of a light, and then ask the controller to recommend a sufficient sum to provide the necessary lights. The argument on the motion of Mr. Shaffer lasted about a half hour, and when it was finished it was discovered that every man present had argued for the motion,

A Petition Comes Up from Morris-Sirpet Property Owners. A petition was filed with the Board of Works yesterday asking that Morris street be improved its entire length with asphalt Common to prime heavy mixed and on the best foundation obtainable. The penedium weight hogs sold at \$3.40\( \text{G3.85.} \) big hogs selling the lowest. Sales were largely at \$3.70\( \text{G3.75.} \), with more at \$3.75 than at any other price. Light sold at \$3.660 propert owners. This petition was not act-

ed upon because the city engineer said a sewer was necessary before the improve-ment could be made. The sewer has not been built, and the property owners want the street improved. It is charged in the letter accompanying the petition that nothing has been done on account of the opposition of William F. Piel, of the starch works. The petition was referred to the city engineer

That Dangerous Gravel Pit.

The city has another damage suit on its pit at Highland place. This time the plaintiff is William H. Meyers, who makes the Big Four company a party defendant to the suit. Meyers wants \$1,000 damages for injuries received on the night of June II, 1895. He avers that he was out riding with Miss Blanche Coltrain, and drove through Highland place. Being unaware of the presence of the gravel pit, he drove into it, and Miss Coltrain was thrown out of the buggy. He was badly bruised, he says, and was compelled to expend considerable money in repairing himself and vehicle.

Petitions for Improvements. The following petitions were filed with the Board of Works yesterday and referred to the city engineer for investigation: For brick pavement on the north side of Spann avenue, from State street to the Big Four railroad. For brick pavement on the first alley west of Delaware street, from Home avenue to

A STATISTICAL LIE.

Col. Wright Exposes a Falsehood Which Has Been Widely Circulated. Washington Special to St. Louis Globe-

It is time to start the truth on the trail of a statistical lie which has been going the rounds for two or three years, and which has been employed extensively by orators to inflame the discontent of American workingmen. This lie is ingeniously clothed in

the following paragraph:
"Mr. Carroll D. Wright, the national labor statistician, has figured out that the average rate of wages per year paid in the United States is \$347, and the average prod-uct of each laborer is valued at \$1,888. This gives the employer 82.2 per cent., while the man who does the work and produces the result is allowed a paltry 17.8 per cent. In spite of our boasted free country and high wages, the fact remains that the proportion of the proceeds of his labor paid to the American workingman is smaller by far than that paid to any workingman in any civilized or uncivilized country on the globe."

Pointing out the fallacy of this paragraph

Mr. Wright says: "If the aggregate wages paid in the manufacturing and mechanical industries of the United States, as shown by the census of 1880, be divided by the total number of employes to whom the wages were paid, the quotient would be 347, thus determining the average wages paid to the employes in man-ufacturing and mechanical industries of the country as \$347. Dividing the aggregate value of all the products of manufacturin and mechanical industries by the number of employes engaged therein, the quotient is 1,965, showing the average product per employe was \$1,965. Now, \$347 is 17.7 per cent, of the gross value of the per capita product, as stated leaving a balance of course of as stated, leaving a balance, of course, 682.3 per cent. of \$1,618, which the originate with less than 154 new lights, but the ultimatum of the board that only \$2,000 would
be asked for or used caused a scale all
along the line, and when the scaling process had been completed it. ST. LOUIS, April 13.—Lead dull at 2.771/2c cess had been completed it was found that ed as cost of production other than wages. "Taking the eleventh census," continues
Mr. Wright, "that for 1890, it is found that
the value of the gross product per capita for
the number of employes engaged in manufacturing and mechanical industries was \$2,204. and the average annual wages per employe, computed for 1890 as already computed for 1880 was \$445. The writer of the paragraph quoted would assume, for the eleventh cen-sus, that, while \$445 was paid to labor, \$1.759 went to the employer. As a matter of fact, of the total product per capita, 20.18 per cent. went to labor, 55.08 per cent. for materiais and 24.74 per cent. to miscellaneous expenses, salaries, interest, profits, etc.

"All spatements like that quoted are fallacious in their application. While the figures in themselves are in the main fairly correct,

"A Short, Red-Faced Irishman."

Army and Navy Journal. In a letter to the editor, Major Edmond G. Fechet, Sixth Cavalry, says:
"Some time ago I heard the following story of Gen. P. H. Sheridan from a former, officer of the Third Michigan Cavalry: It seems that when that regiment first went out it was without a colonel, and the officers had an idea that they would like an officer of the regular army to fill the va-St. Louis, and hearing that a regular officer by the name of Sheridan was in the city, and that he wanted the command of regiment, a committee was appointed to the city and see him, or, as the narrator expressed it, to take Sheridan's measure. On the return of the committee the officers assembled to hear its report, which was as follows: 'Well, we went up and saw Mr. Sheridan. He is a short, red-faced Irishman, and don't seem to amount to much. We do not think that he would do for colonel of our regiment. The gentleman who told me this story gave the names of other officers of the regiment who, he said, could vouch for its truth."
